National Priorities Addressed

Issue Questions	Responses
1. Will the treatment you intend to implement using EQIP result in a considerable reduction of non-point source pollution, such as nutrients, sediment, pesticides, excess salinity in impaired watersheds with total maximum daily loads (TMDLs) where available, groundwater contamination or point sources such as contamination from confined animal feeding operations?	Yes <input type="radio"/> or No <input type="radio"/>
2. Will the treatment you intend to implement for water conservation or irrigation efficiency using EQIP result in a considerable reduction in water use?	Yes <input type="radio"/> or No <input type="radio"/>
3. Will the treatment you intend to implement using EQIP result in a considerable reduction of emissions, such as particulate matter, nitrogen oxides (NOx), volatile organic compounds, and ozone precursors and depleters that contribute to air quality impairment violations of National Ambient Air Quality Standards?	Yes <input type="radio"/> or No <input type="radio"/>
4. Will the treatment you intend to implement using EQIP result in a considerable reduction in soil erosion and sedimentation from unacceptable levels on agricultural land?	Yes <input type="radio"/> or No <input type="radio"/>
5. Will the treatment you intend to implement using EQIP result in a considerable increase in the promotion of at-risk species habitat conservation?	Yes <input type="radio"/> or No <input type="radio"/>
6. Will the treatment that you intend to implement using EQIP result in considerable benefits to residue management, nutrient management, air quality management, invasive species management, pollinator habitat, and animal carcass management technology or pest management?	Yes <input type="radio"/> or No <input type="radio"/>
7. Will the treatment that you intend to implement using EQIP result in energy conservation benefits?	Yes <input type="radio"/> or No <input type="radio"/>

State Issues Addressed

Issue Questions	Responses
1. Will the project reduce the amount of nutrients/pesticides/salt/selenium or other pollutants entering ground or surface waters?	Yes <input type="radio"/> or No <input type="radio"/>
2. Will the planned practice(s) promote water conservation on the contracted acres?	Yes <input type="radio"/> or No <input type="radio"/>
3. Will the project address invasive or noxious plants on contracted acres?	Yes <input type="radio"/> or No <input type="radio"/>
4. Will the project result in an improvement to the existing management system to meet the state AFO/CAFO regulations?	Yes <input type="radio"/> or No <input type="radio"/>
5. Does the project increase the diversity of desirable plants on grazing lands?	Yes <input type="radio"/> or No <input type="radio"/>
6. Does the project improve the health of riparian and/or wetland areas?	Yes <input type="radio"/> or No <input type="radio"/>
7. Is/Is the proposed project located within the State's NRCS wildlife priority area, and do the planned practices address the habitat needs of the targeted species designated in the wildlife priority area or is the plan designed for pollinator habitat?	Yes <input type="radio"/> or No <input type="radio"/>
8. Will the proposed project reduce field soil loss to below "T" or will the planned practice(s) reduce irrigation induced/stream bank erosion?	Yes <input type="radio"/> or No <input type="radio"/>
9. Does the applicant meet one or more of the following conditions: a. Did the applicant successfully complete any past EQIP contract(s) in full compliance; or b. If the applicant has an existing EQIP contract has it been, and is it now, on schedule and in full compliance; or c. Applicant has never participated in EQIP?	Yes <input type="radio"/> or No <input type="radio"/>
10. Has any portion of the offered acreage been set aside or inventoried by a Cultural Resources Specialist or Archaeologist?	Yes <input type="radio"/> or No <input type="radio"/>
11. Does the proposed project support organic transition (farming operation to be used while transitioning from conventional to organic production)?	Yes <input type="radio"/> or No <input type="radio"/>

Local Issues Addressed

Issue Questions	Responses
1. Permanent Vegetative Cover: Will >50% of the cropland acreage under this project be converted to Native perennial species under Range Seeding (550)? (yes on only one of questions 1-3)	Yes <input type="radio"/> or No <input type="radio"/>
2. Permanent Vegetative Cover: Will 16-50% of the cropland acreage under this project be converted to Native perennial species under Range Seeding (550)? (yes on only one of questions 1-3)	Yes <input type="radio"/> or No <input type="radio"/>
3. Permanent Vegetative Cover: Will 1-15% of the cropland acreage under this project be converted to Native perennial species under Range Seeding (550)? (yes on only one of questions 1-3)	Yes <input type="radio"/> or No <input type="radio"/>
4. Permanent Vegetative Cover: Will >50% of the cropland acreage under this project be converted to Introduced perennial species under Pasture and Hayland Planting (512)? (yes on only one of questions 4-6)	Yes <input type="radio"/> or No <input type="radio"/>
5. Permanent Vegetative Cover: Will 16-50% of the cropland acreage under this project be converted to Introduced perennial species under Pasture and Hayland Planting (512)? (yes on only one of questions 4-6)	Yes <input type="radio"/> or No <input type="radio"/>
6. Permanent Vegetative Cover: Will 1-15% of the cropland acreage under this project be converted to Introduced perennial species under Pasture and Hayland Planting (512)? (yes on only one of questions 4-6)	Yes <input type="radio"/> or No <input type="radio"/>
7. Air Quality/Soil Condition: Will the participant implement a No-till/Strip-till/Direct Seed (329) system on 100% of the annually cropped acres under this plan?	Yes <input type="radio"/> or No <input type="radio"/>
8. Soil Erodibility: The Hydrologic Grouping of the soil on this project (based on predominant soil type) is Moderately High (C) to High (D).	Yes <input type="radio"/> or No <input type="radio"/>
9. Soil Erodibility: The Hydrologic Grouping of the soil on this project (based on predominant soil type) is Low (A) to Moderately Low (B).	Yes <input type="radio"/> or No <input type="radio"/>
10. Soil Erodibility: The Representative Slope (RV) of the soil on this project (based on predominant soil type) is $\geq 4\%$.	Yes <input type="radio"/> or No <input type="radio"/>
11. Soil Erodibility: The Representative Slope (RV) of the soil on this project (based on predominant soil type) is $< 4\%$.	Yes <input type="radio"/> or No <input type="radio"/>
12. Soil Erodibility: The Erosion Factors I divided by T (I/T) for the soil on this project (based on predominant soil type) is ≥ 18 .	Yes <input type="radio"/> or No <input type="radio"/>
13. Soil Erodibility: Is $> 25\%$ of the cropland affected by classic or ephemeral gully erosion?	Yes <input type="radio"/> or No <input type="radio"/>
14. Irrigation-induced Erosion: Will a new ditch lining or pipeline be installed to address irrigation-induced erosion?	Yes <input type="radio"/> or No <input type="radio"/>
15. Buffers: Will a Windbreak (380), Field Border (386), Filter Strip (393), or Grassed Waterway (412) be installed to protect cropland from erosion?	Yes <input type="radio"/> or No <input type="radio"/>
